

S/4 HANA Cloud – Team Enablement

Agenda

1

SAP S/4HANA Cloud Product & Services - Overview

2

SAP S/4HANA Cloud Implementation Assets & Methodology

3

SAP S/4HANA Cloud Implementation Process

4

Data Migration Workbench

5

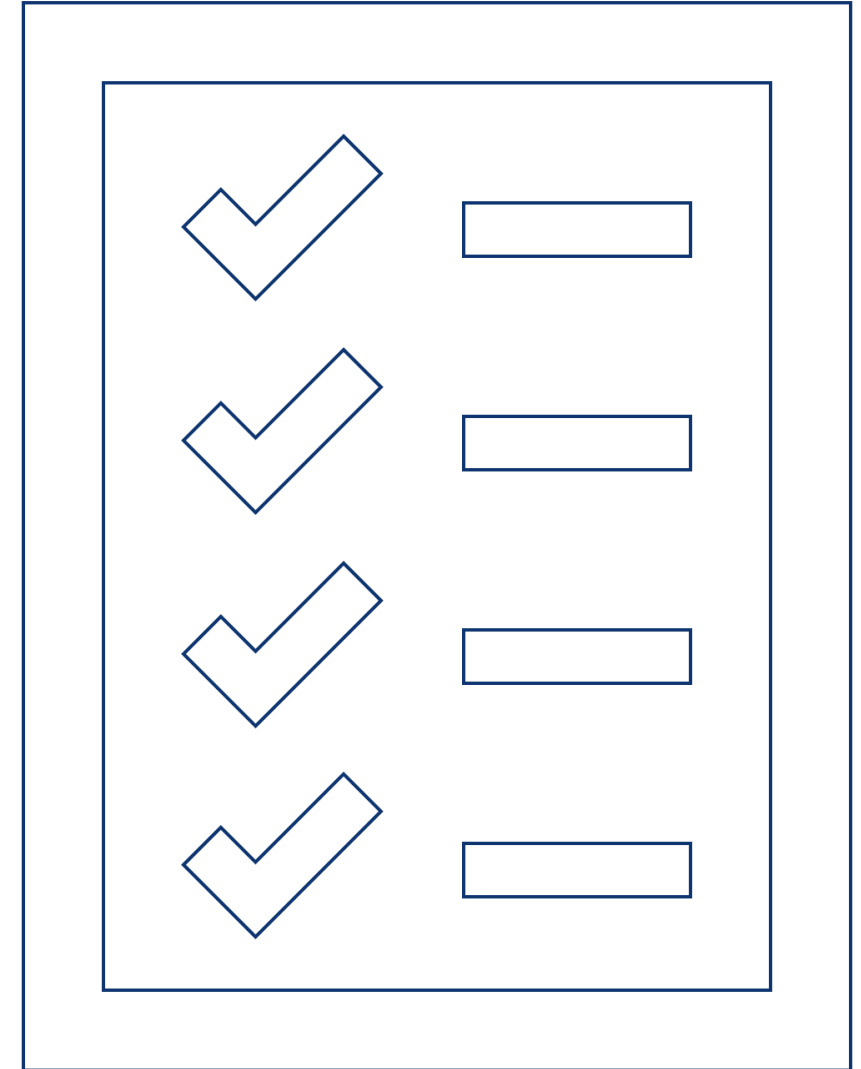

Testing SAP S/4HANA Cloud

6

Extensibility Framework in SAP S/4HANA Cloud

Your takeaways after this session

- Equip yourself with knowledge of S/4HANA Public Cloud product
- Gain knowledge of the various S/4HANA Cloud accelerators and assets
- Gain knowledge of the S/4HANA Cloud implementation methodology and implementation process
- Guide your teams on the various S/4HANA Cloud learning paths and available certifications

Classroom Learning

Foundation Topics

- S/4HANA Cloud Product
- Implementation Process
- Data Migration
- Testing
- Extensibility

5 Hours

LOB Based Learning

- Solution Scope Definition
- Self Service Configuration UIs
- Expert Configuration Templates
- Data Migration Templates
- Extensibility Framework

2 Hours/LoB

Online Learning

Course Material

- S4C01
- ACT100/E
- ACT200
- TS4C01
- UX001s / JOY063

Self Paced

Course Material

- S4C10/20/30/40/60
- UX004s/UX006s/UX101/UX400/UX402 /UX410/UX411s/UX412
- GW100/JOY045/iOS1/X009s

Self Paced

Certification

Certified SAP Activate Project Manager

SAP Certified Application Associate – SAP S/4 HANA Cloud On-boarding

SAP Certified Application Associate – SAP S/4 HANA Cloud (LoB)

SAP Certified Development Associate

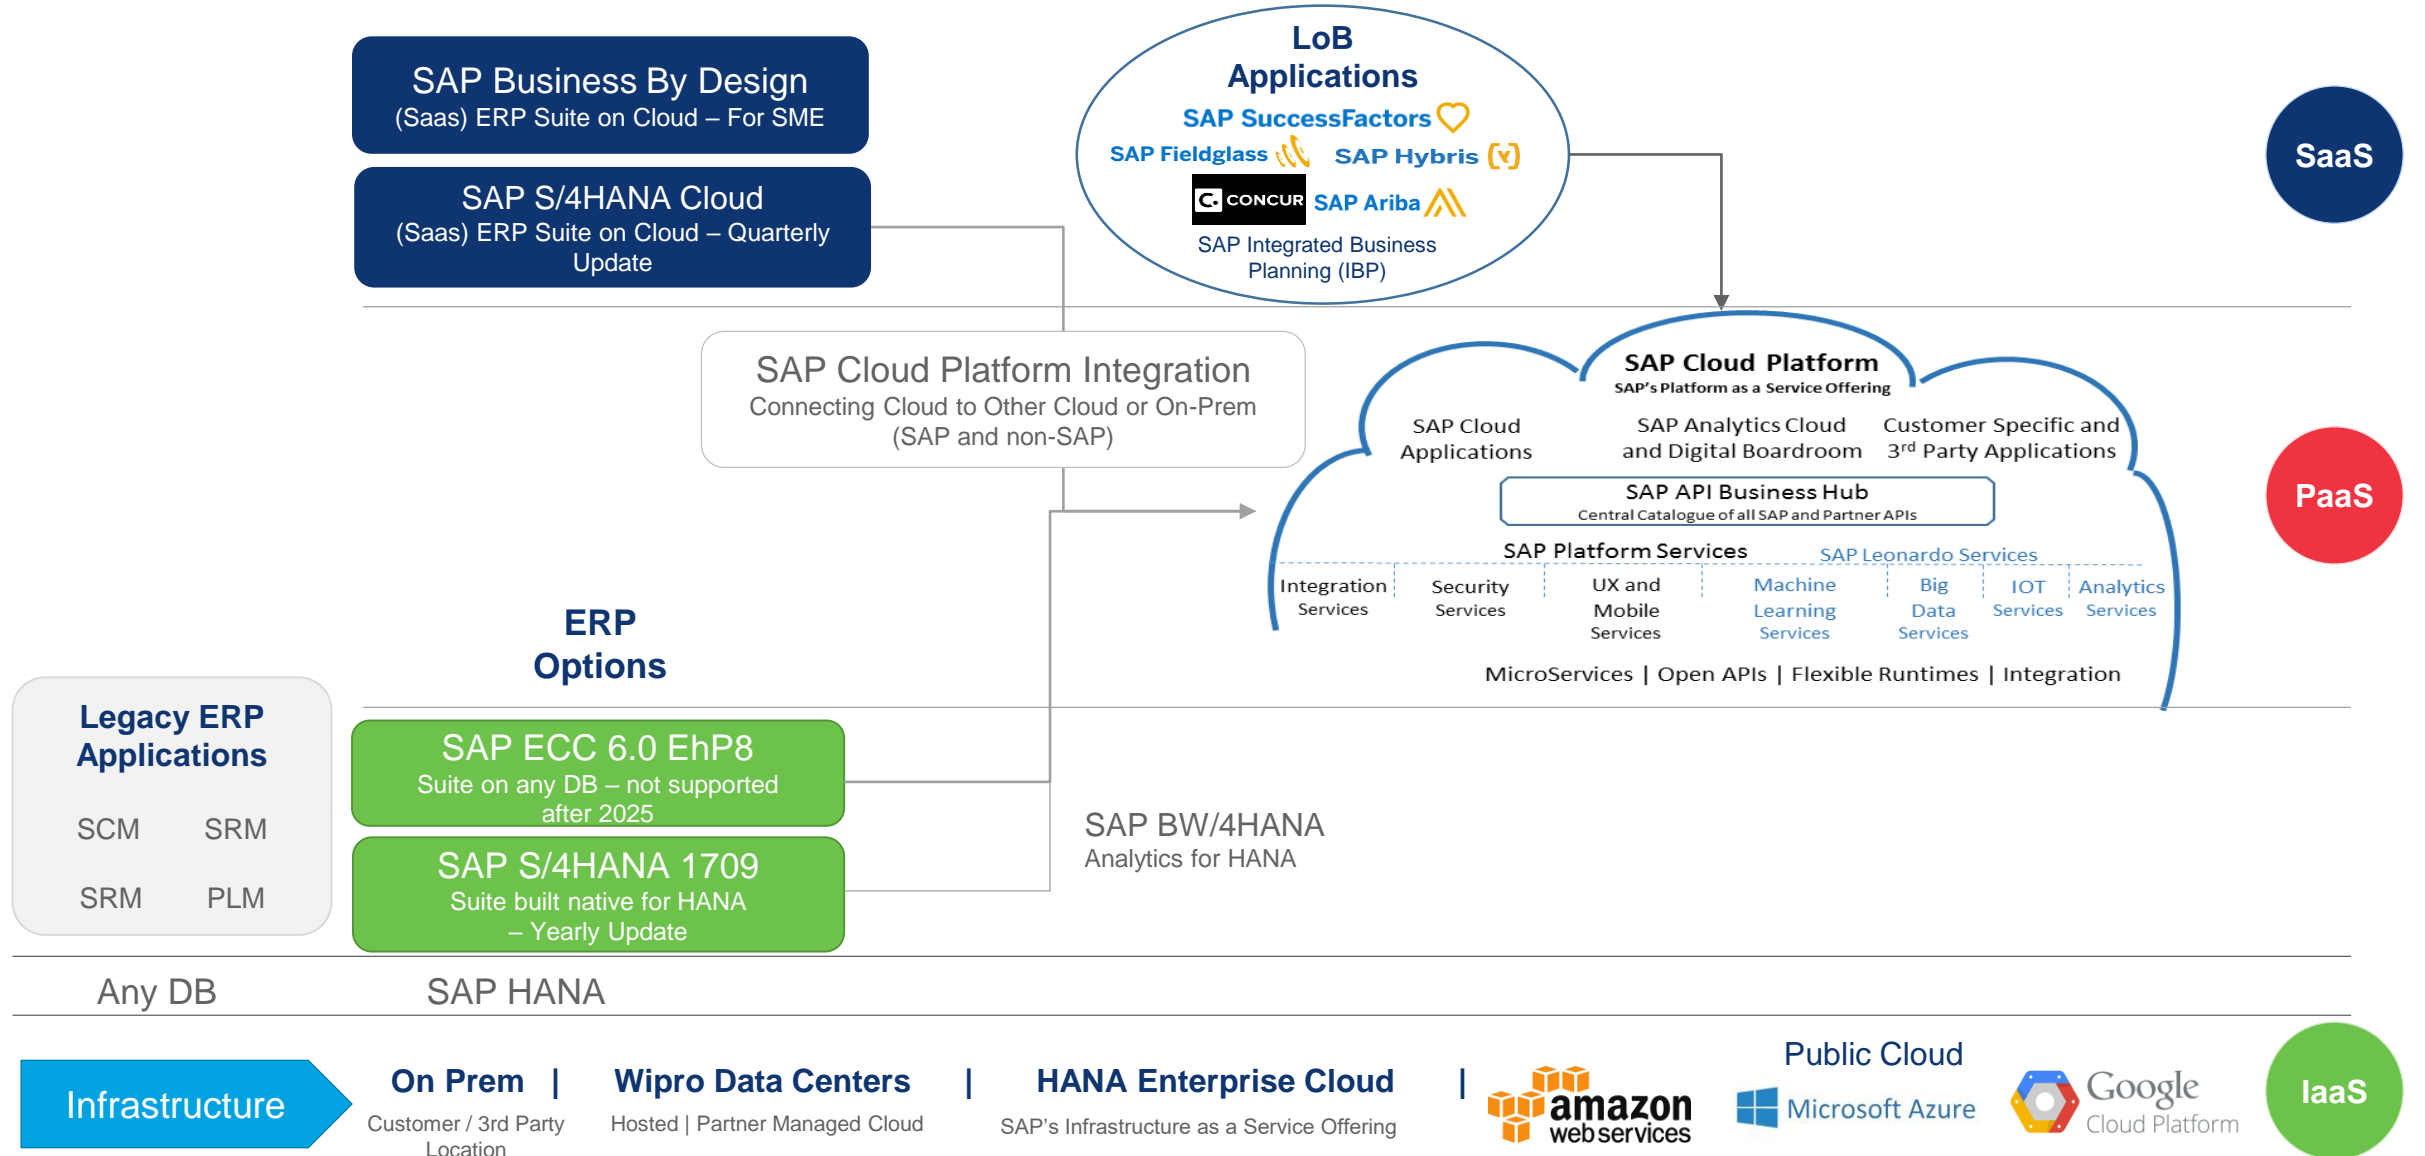

SAP Certified User Experience Associate

SAP S/4HANA Cloud Product & Services – Overview

SAP portfolio

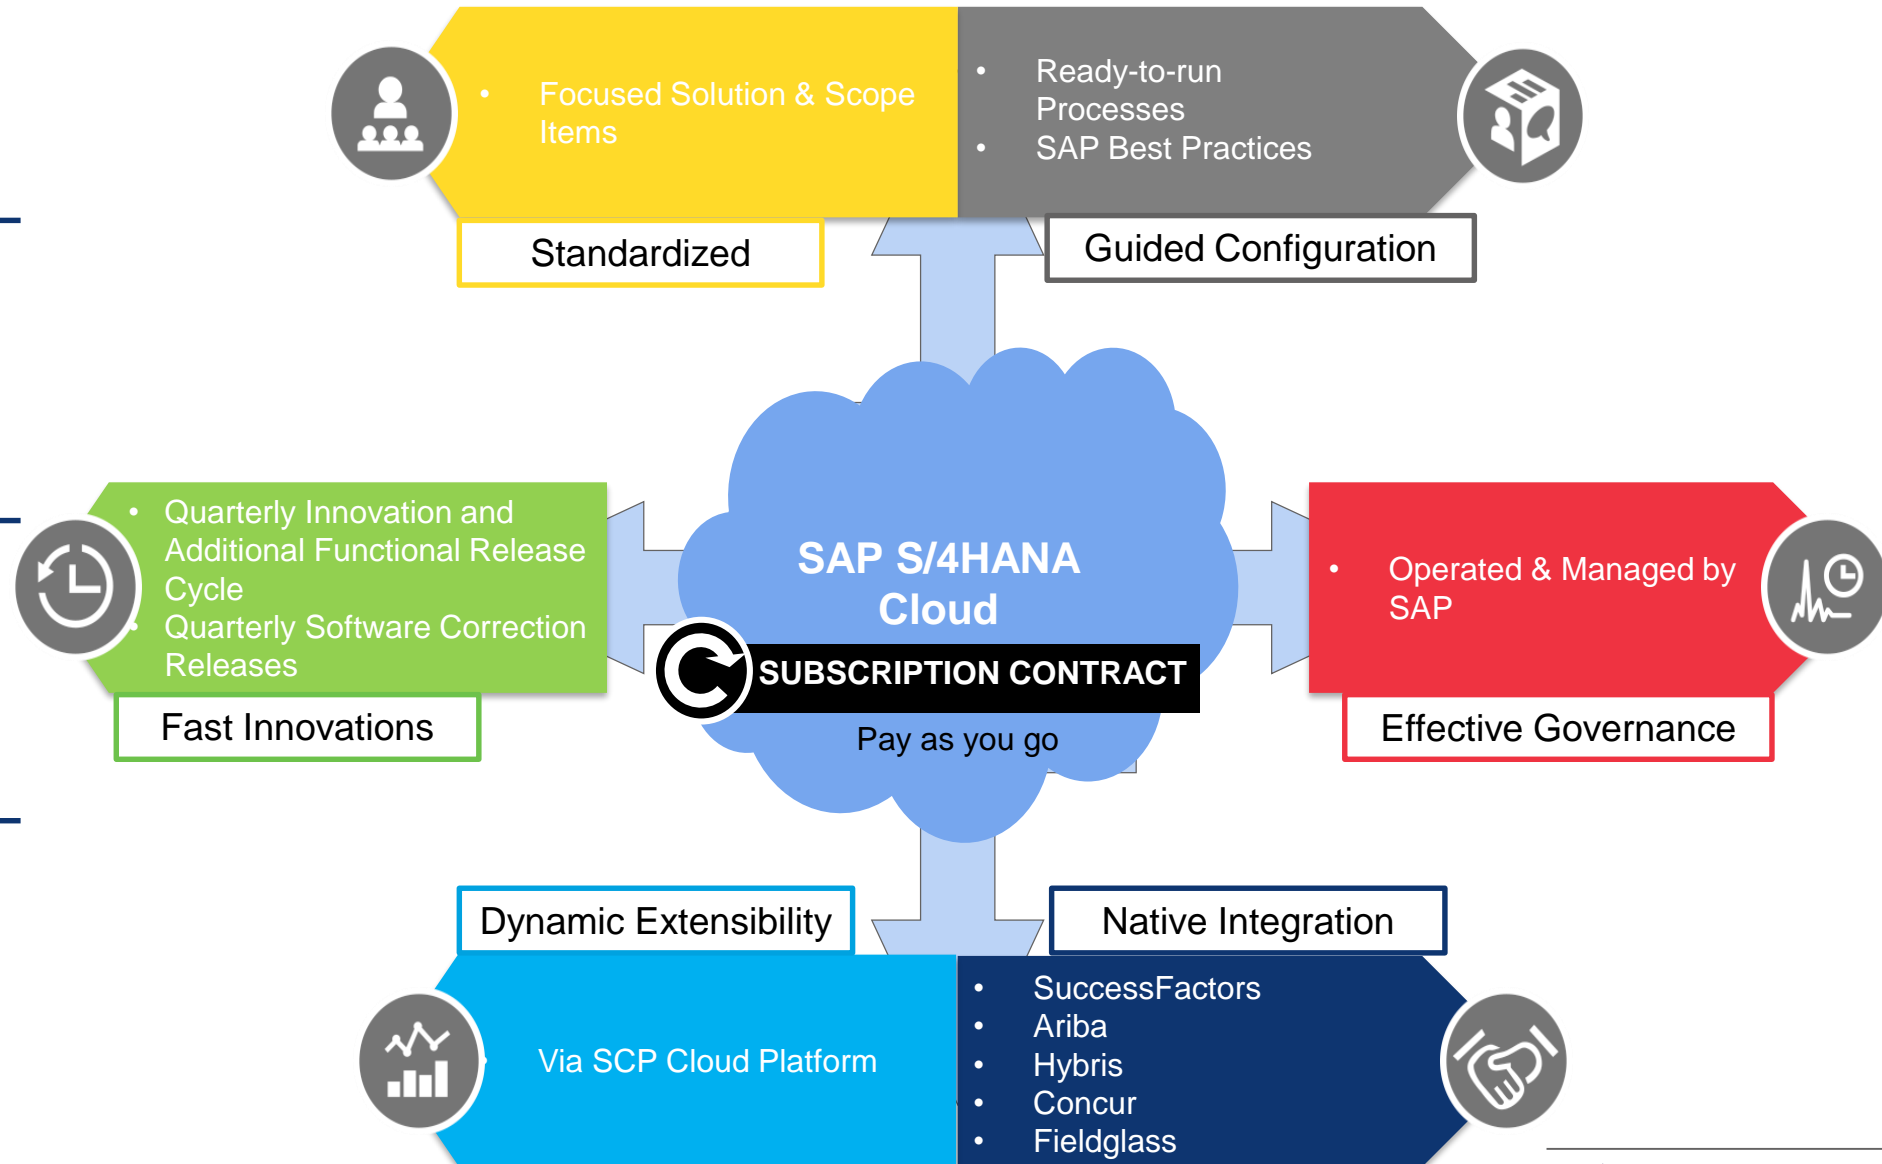

S/4HANA Public Cloud Product Overview

SAP S/4HANA Cloud is a highly standardized SaaS offering

SAP S/4HANA Cloud Edition resides on SAP owned infrastructure

SAP openly promotes a cloud first strategy

What makes SAP S/4HANA Cloud an Intelligent ERP

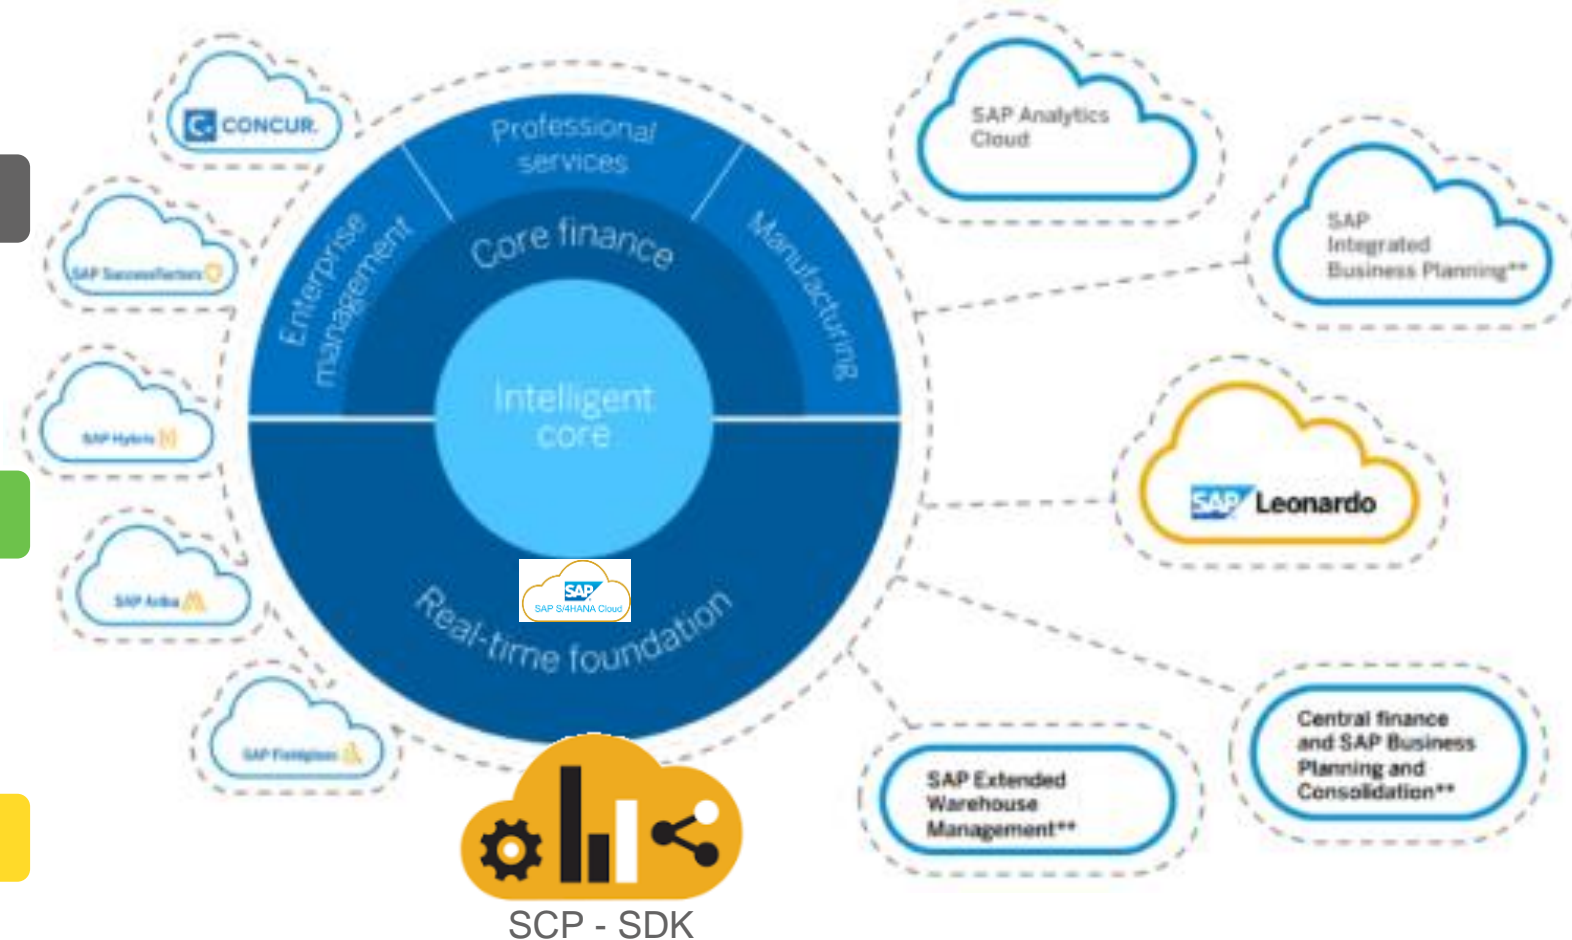

Closed loop decision making system supported by;

- Embedded Analytics
- Steer Via Exceptions
- Simulation and Prediction
- Hyper Automated via SAP Leonardo Machine Learning

S/4HANA Cloud is built around the Digital Core

- Platform for Innovations
- Digital core supported by cloud native applications for end-to-end process innovations
- System of records with augmented layers of predictive intelligence application and tools
- Streamline old ways of working

SAP S/4HANA Cloud Software Development Kit (SDK) provides capabilities to build own apps and extensions

Intelligent User Experience

Industry Applications

Platform Services

Contextual Information

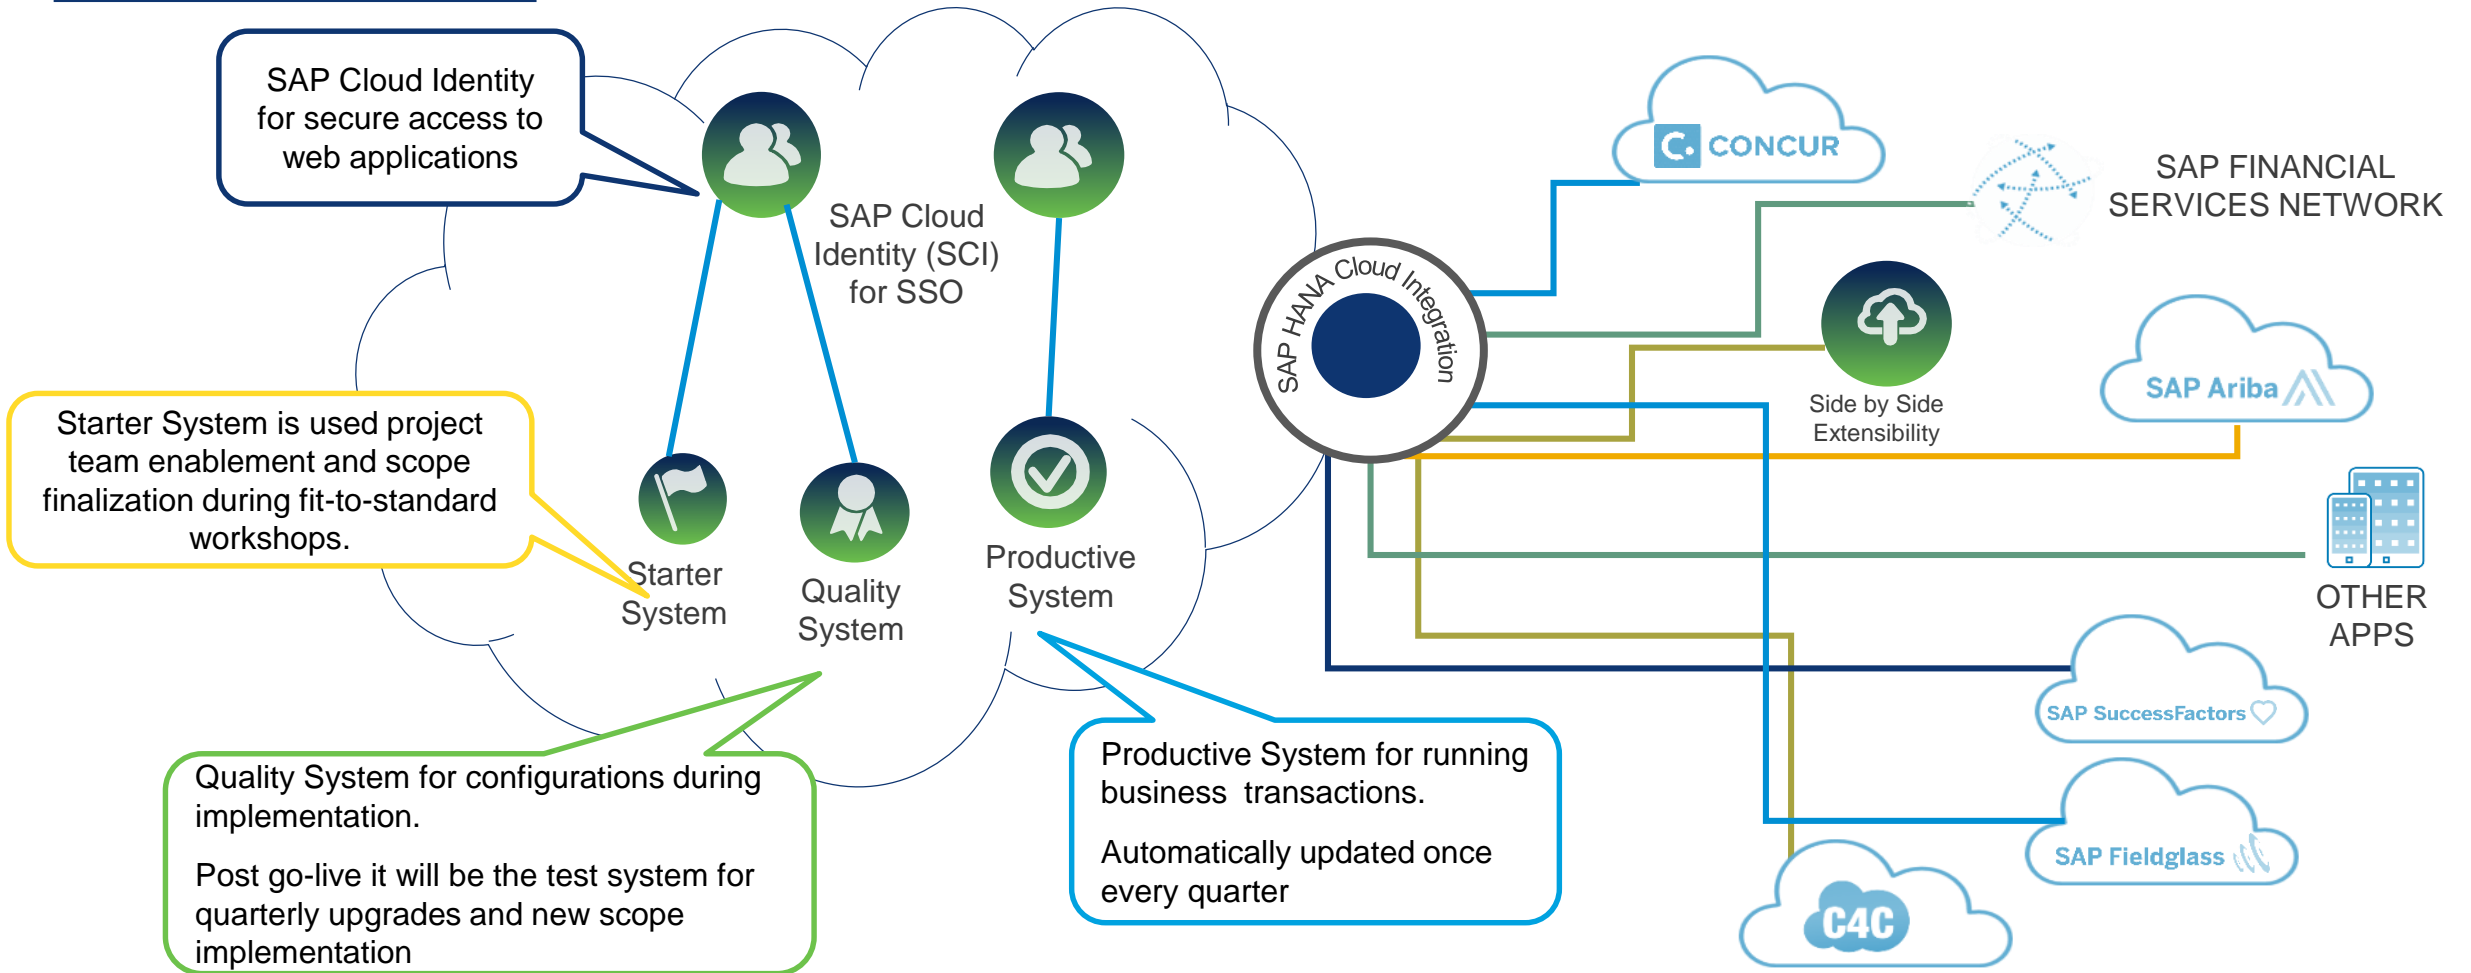

Open Architecture

Business Networks

Enhance Business Process for Outcomes

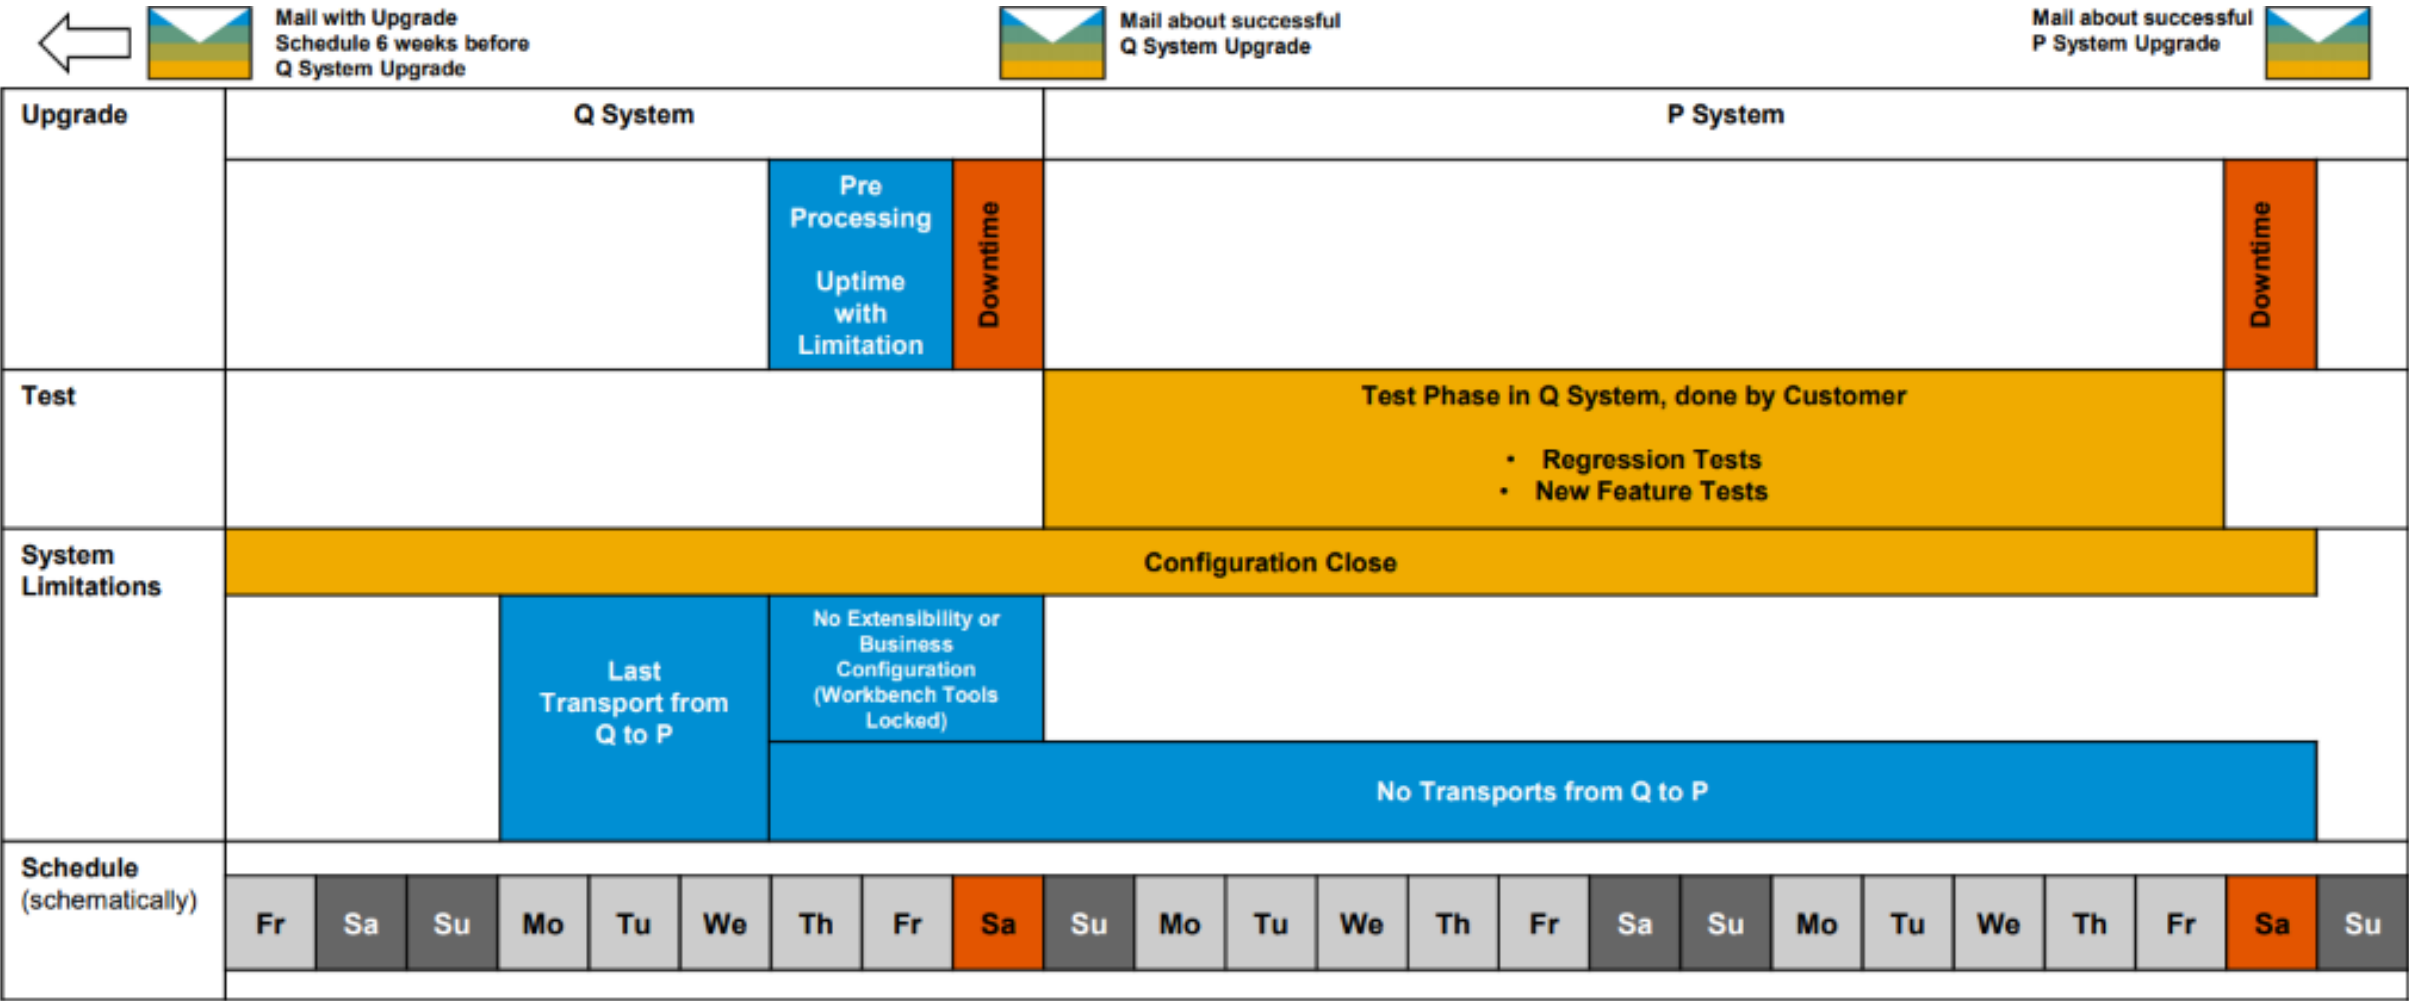

Non-Disruptive & Flexible Deployment Options

SAP S/4HANA Cloud System Landscape

Landscapes and Upgrades

Quarterly Upgrade Process

Solution Scope Items – Summary

Finance

107 total scope items in Best Practice Solution Library

50 are core solutions that will be always relevant

57 are advanced or specialized scenarios applicable only under “if-applicable” circumstances

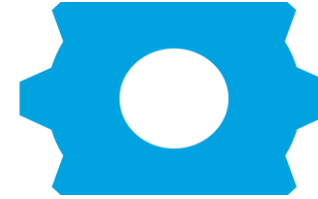

24 mandatory key data elements need to be set up in Finance and Controlling

Procurement

Procurement has 24 core solutions that will be always relevant

23 mandatory key data elements need to be set up in Procurement modules

Manufacturing

Procurement has 28 core solutions that will be always relevant

7 mandatory key data elements need to be set up in production modules

Sales & Distribution

Sales & Distribution has 47 core solutions that will be always relevant

11 mandatory key data elements need to be set up in sales and distribution

Industries Supported

Professional Services

Component Manufacturing

Localization Supported

33 Countries

18 Languages

End-to-End LOB Solutions in S/4 HANA Cloud

Finance	Human Resources	Sales	Asset Management	Manufacturing	R&D / Engineering	Sourcing and Procurement	Supply Chain	Professional Services
Accounting	Time Recording	Order and Contract Management	Maintenance Management	Basic Production Planning	Project Planning and Execution	Operational Purchasing	Inventory Management	Contract to Cash
Accounting and Closing Operations				Basic Production Processing	Compliant Product Lifecycle Management	Collaborative Sourcing and Contract Management		Time and Expense Management
Advanced Financial Operations					Project Control	Invoice and Payable Management		Project Management
Contract and Lease Administration						Supplier Management		
Cost Management and Profitability Analysis						Procurement Analytics		
Treasury Management								

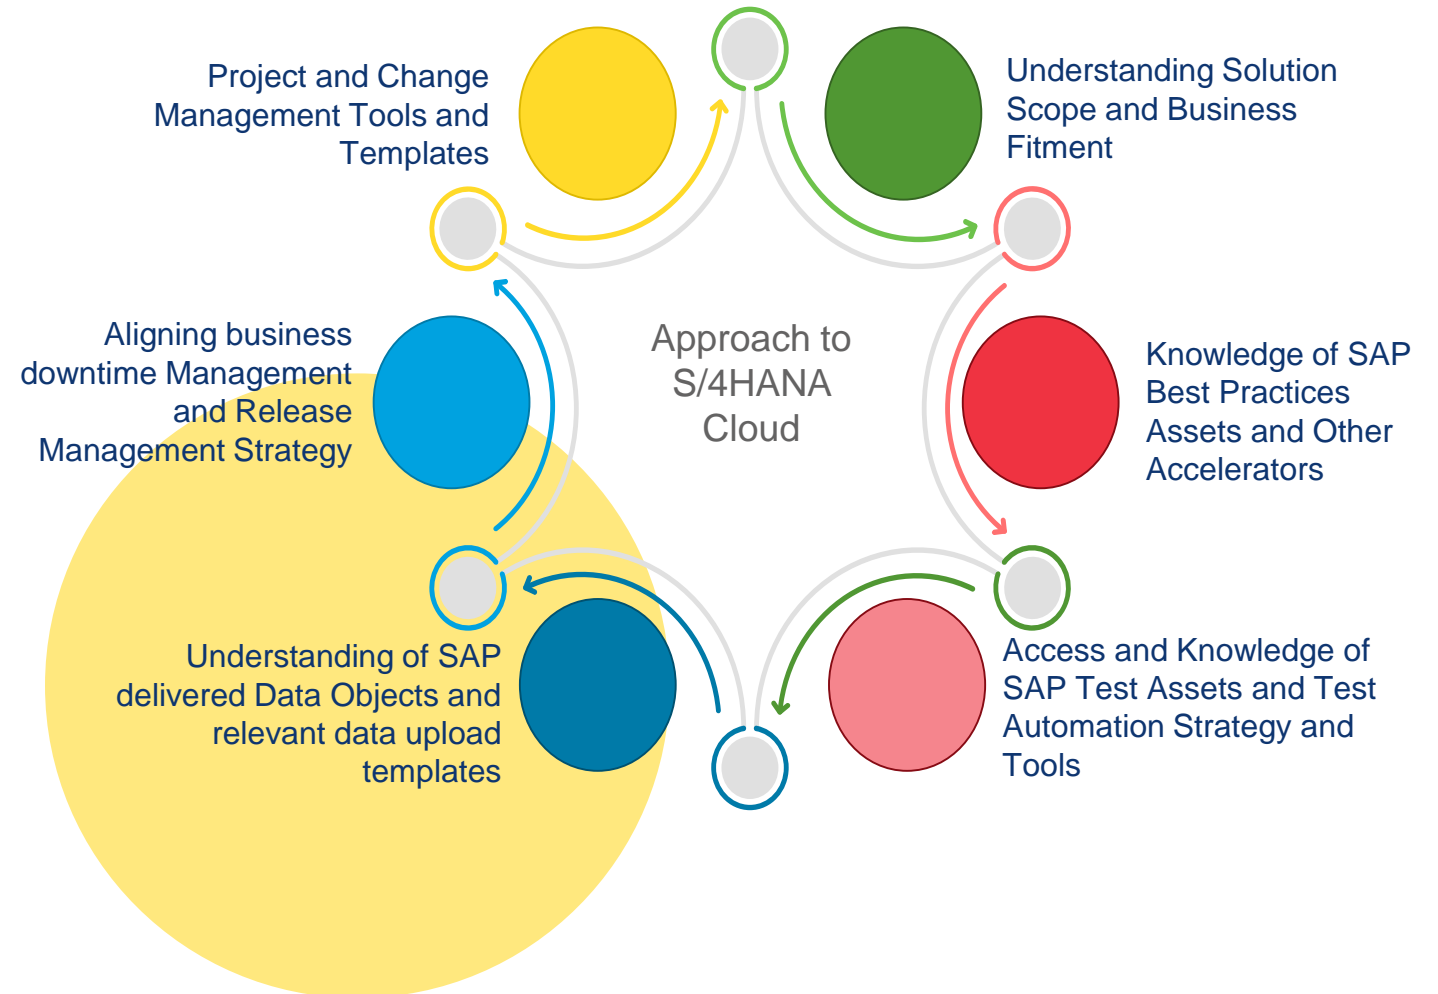

SAP S/4HANA Cloud Implementation Assets

S/4HANA Cloud – Packaged around Process Standardization

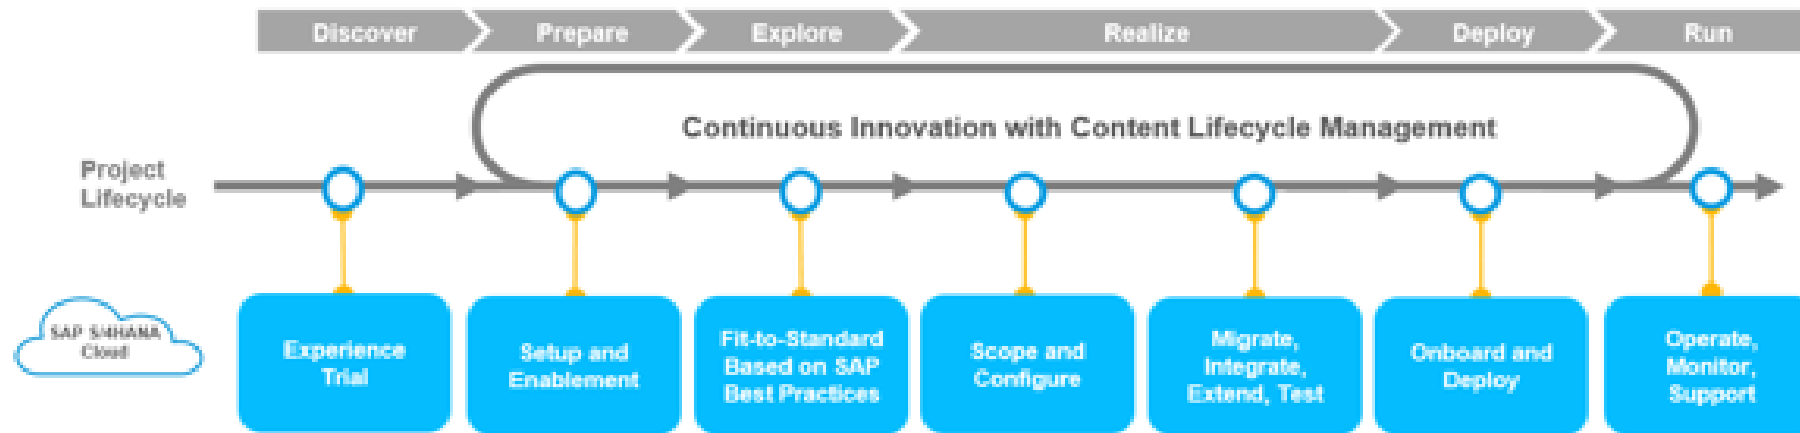

Cloud Adoption Critical Success Factors

- Choosing the cloud edition is a decision to adapt standard processes, such as procure-to-pay and order-to-cash
- Cloud edition automatically enrolls the customer into a quarterly upgrade cycle.
- Two-time slots are available to choose from. First to upgrade the testing environment, and then two weeks later the upgrade the production environment.
- All flows need to be re-tested every quarter.
- The role of the implementation consultant is more that of a change agent.
- Requires an experienced transformation consultant who combines project management skills with strong change management capabilities

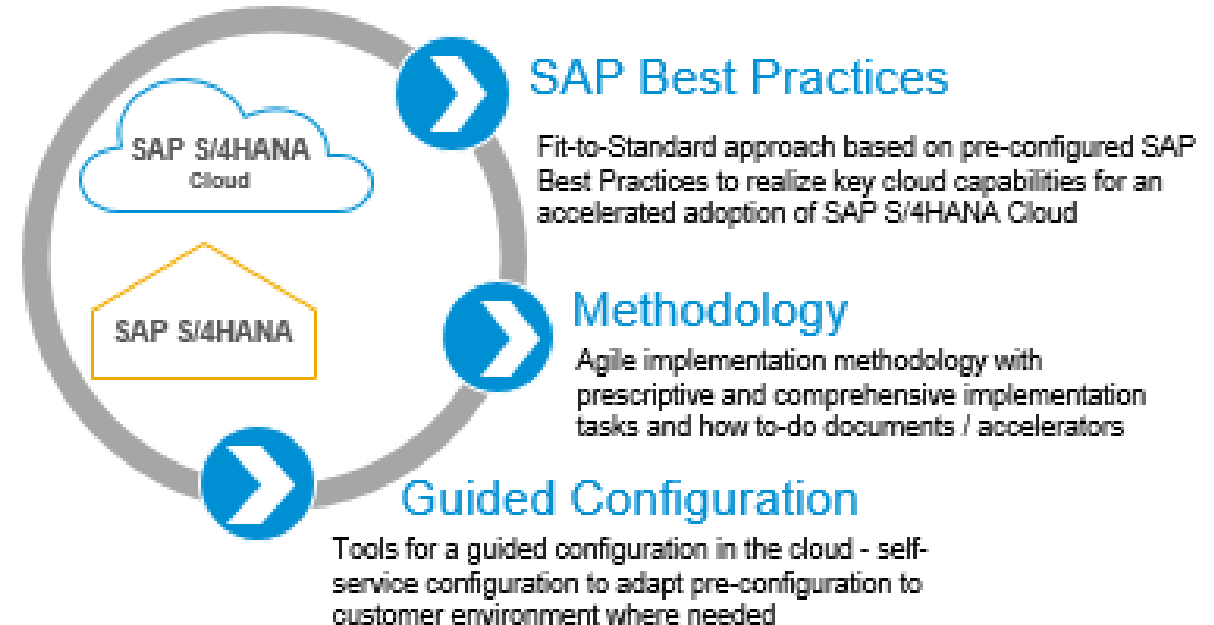

SAP Activate Implementation Methodology

The Road to SAP S/4HANA with SAP **ACTIVATE**

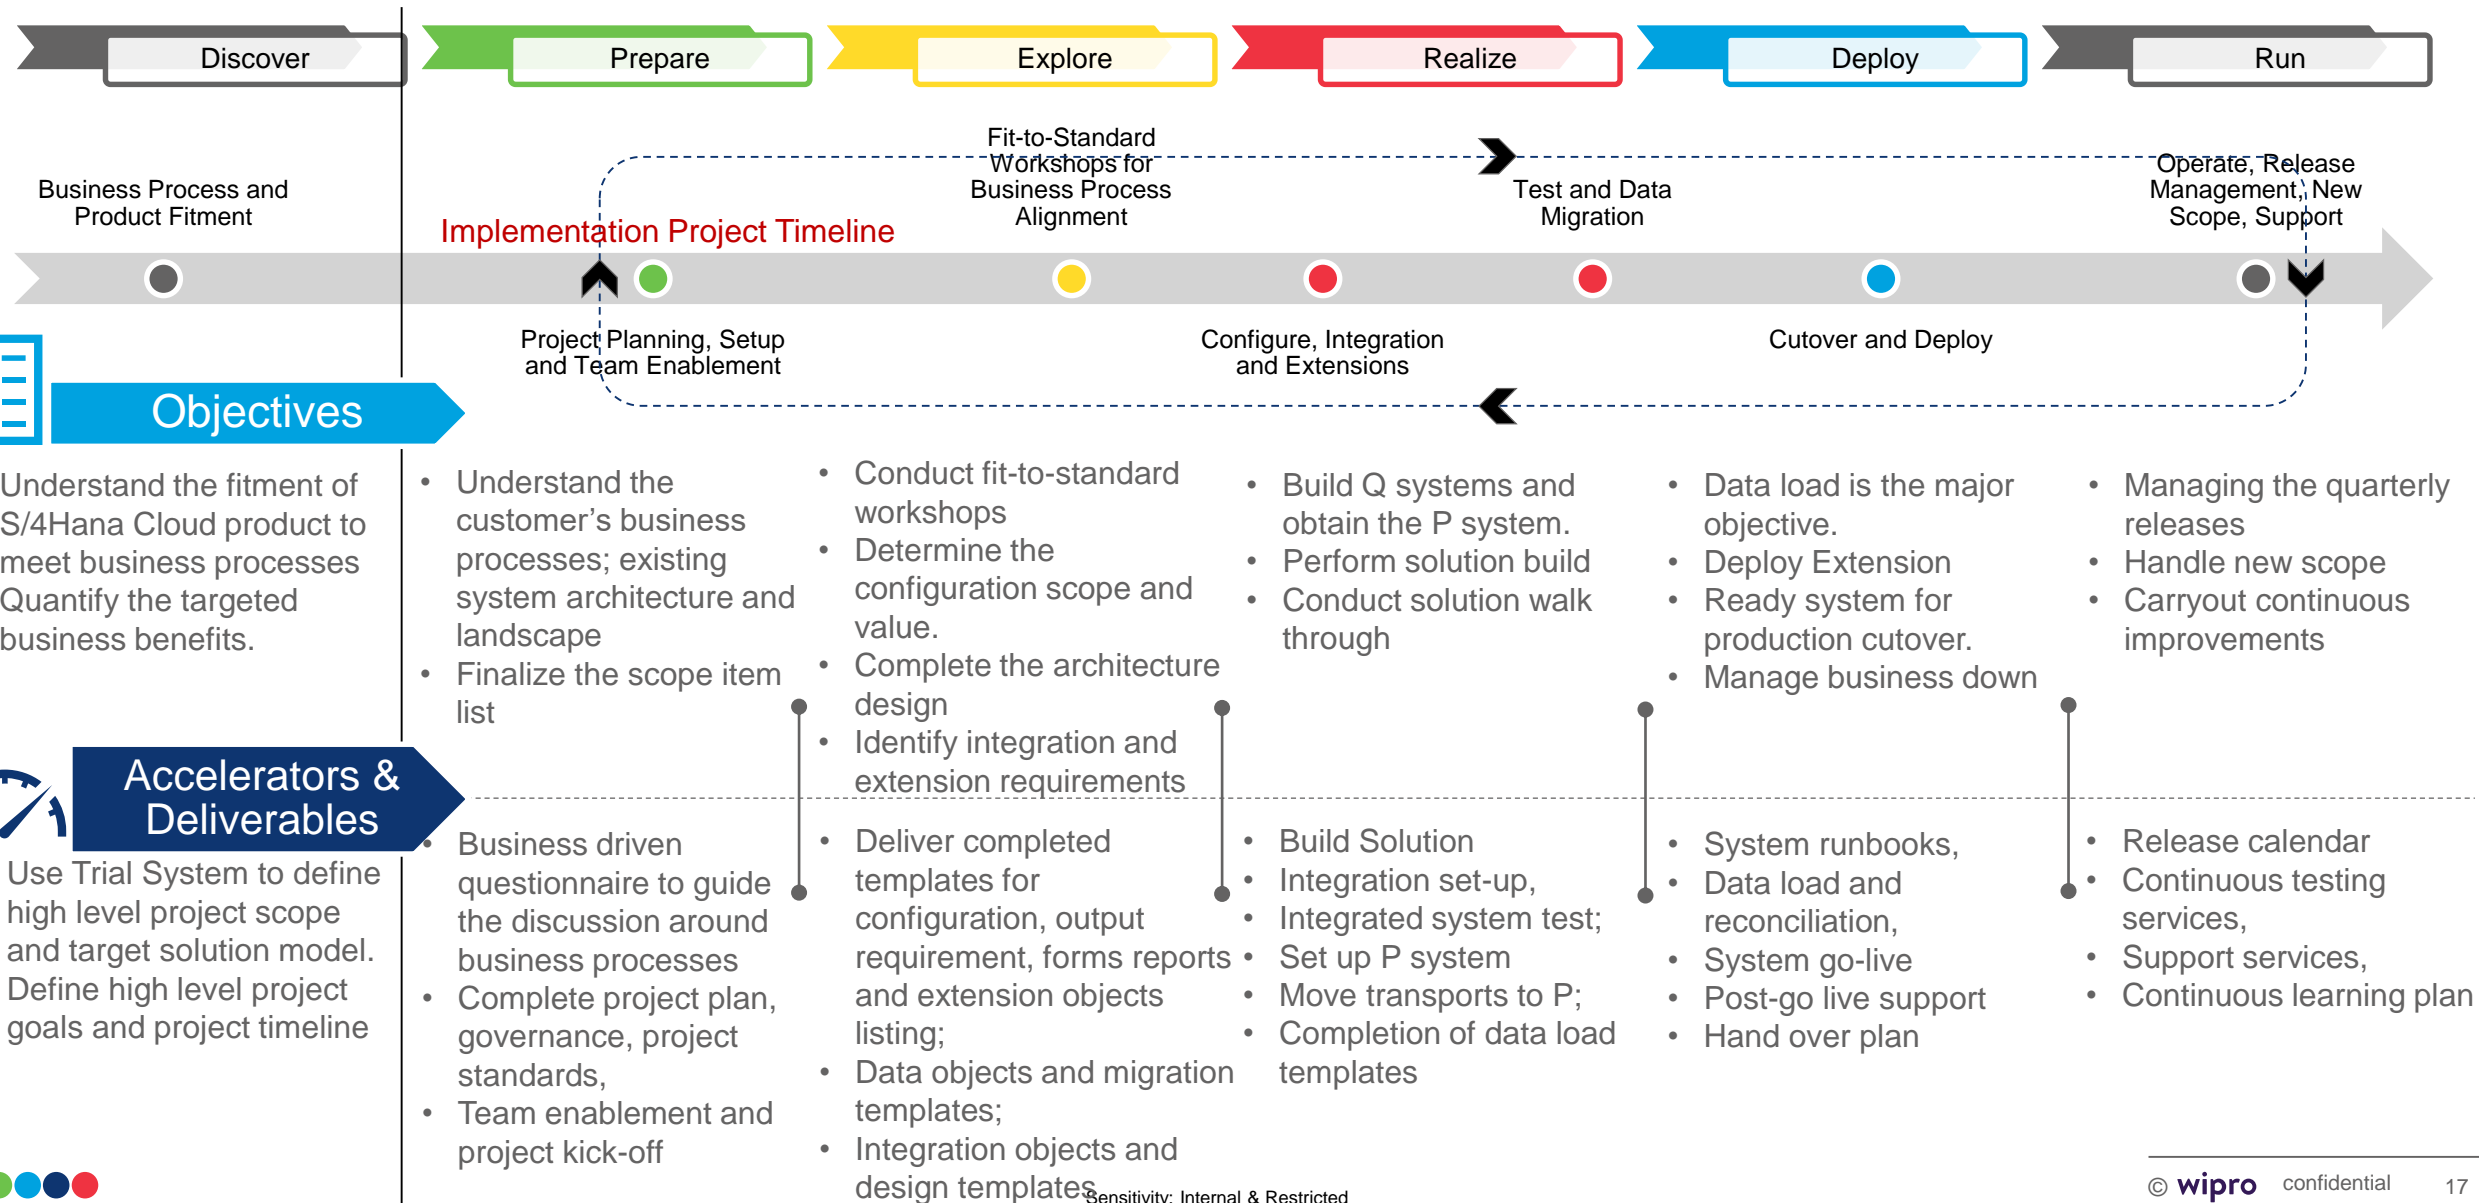

SAP Activate

- Is the innovation adoption framework that expedites SAP S/4HANA implementations throughout the customer lifecycle
- Supports faster, less service intensive deployments and is aiming at continuous adoption of innovations throughout the entire project lifecycle
- Supports different starting points for customers to adopt SAP S/4HANA – for new implementations, system conversions and landscape transformation scenarios
